These streets represent a cross-section of urban and suburban neighborhoods across 19 districts of Davidson County. They were selected for projects based on:

Vulnerable User Crash Survivability & Probability (70%):

Vehicular speed and volume data collected by NDOT.

Vulnerable User Experience (30%):

Traffic speeds often discourage safe use of streets by pedestrians and cyclists. The presence of likely nearby trip destinations (schools, parks, etc.) non-driver accommodations (bus routes, lack of sidewalks, etc.), and vulnerable user injuries/fatalities are evaluated in this prioritization data category.

*Council Districts as of August 2023 redistricting
